

CAREW ABDUL MOJEED OPEYEMI

Full-Stack JavaScript Engineer | Expo (React Native) | Next.js | Node.js | PostgreSQL | TypeScript
Remote | (+234) 913 324 4243 | carewabdul03@gmail.com | github.com/pluggito

PROFESSIONAL SUMMARY

Full-stack JavaScript engineer with 4+ years of experience building and shipping production applications across fintech, social, AI, and data-intensive platforms. Founded Chowvest Global, a fintech savings platform with Turborepo monorepo architecture, Redis rate limiting, automated cron systems, and NGN 300,000+ in real transaction volume. Built DocuLens Studio, a cross-platform AI document intelligence platform with cross-validated OCR and Gemini Vision achieving up to 99% extraction confidence. Specialised in React, Next.js, Node.js, PostgreSQL, Prisma ORM, and payment integrations using Paystack and Stripe.

WORK EXPERIENCE

Founder & Full-Stack Engineer | Chowvest Global | Lagos, Nigeria *December 2025 – Present*

- Founded and architected a fintech commodity savings platform processing NGN 300,000+ in real transaction volume
- Built a Turborepo monorepo with three Next.js apps — user portal, admin dashboard, and logistics/rider portal — sharing a centralised Prisma + PostgreSQL database layer
- Implemented commodity-linked price-lock savings logic with dynamic lifecycle states (active, paused, expired, auto-completed) and penalty-free refund flows
- Designed and deployed a daily cron orchestration system handling transaction cleanup, goal reminders, pause triggers, and price change detection concurrently via Promise.all
- Integrated Upstash Redis for sub-millisecond rate limiting and suspicious activity detection, with automatic IP blocking and audit trail logging
- Built financial reconciliation dashboard tracking deposit volume, Paystack fee variance, and true net platform revenue
- Implemented k6 stress testing across spike (200 VU) and soak profiles covering public APIs, session gateways, and database concurrency

Technologies: *Next.js, Supabase, PostgreSQL, Prisma ORM, Redis (Upstash), Paystack API, NextAuth, Tailwind CSS, Turborepo, Docker, Vercel*

Full-Stack Developer | Starboard AI | Lagos, Nigeria (Remote) *April 2025 – July 2025*

Contract

- Built automated data integration pipeline processing over 100,000 records from ZolaApp and US Census databases
- Developed custom REST API endpoints aggregating multiple datasets, reducing data retrieval latency by 40%
- Created interactive data visualisation dashboards using React.js to improve stakeholder data accessibility
- Designed automated data validation and cleaning processes ensuring consistent, production-ready structured outputs

Technologies: *React.js, Node.js, Express.js, PostgreSQL, RESTful APIs*

Transaction Recording Specialist | Credite Capital Finance and Investment Ltd | Lagos, Nigeria *Aug–Nov 2023 | Sep 2024–Jan 2025*

Internship (two stints)

- Recorded and maintained detailed financial transactions in internal databases with 99.8% accuracy
- Coordinated with accounting team to resolve discrepancies, gaining early exposure to data integrity and fintech workflows

PROJECTS

DocuLens Studio – AI Document Intelligence Platform | AI | Cross-platform *July 2026*

- Built a cross-platform document intelligence platform processing invoices, CVs, contracts, and receipts with automatic type detection — no manual categorization required

- Implemented a two-stage AI pipeline with cross-validated OCR (Tesseract.js) and Gemini Vision achieving up to 99% extraction confidence
- Built Human-in-the-Loop verification flow allowing users to review, correct, and approve AI-extracted data before export
- Architected a Turborepo monorepo sharing extraction logic, Zod schemas, and Zustand state across Next.js web and Expo React Native apps
- Implemented Redis-based rate limiting (3 uploads/day, 10-minute cooldown) to manage free-tier AI quota efficiently

Technologies: *Next.js, Expo (React Native), Gemini AI, Tesseract.js, Turborepo, Neon DB, Upstash Redis, Zod, Zustand*

Chowvest – Food Savings and Price-Locking Platform | Fintech | Live December 2025

- Full-stack fintech platform enabling users to save toward food baskets while locking commodity prices against market fluctuations
- Processed NGN 300,000+ in real transaction volume via Paystack; implemented idempotent webhook handling to prevent duplicate charges
- Built complete savings lifecycle including progressive funding, price-lock logic, withdrawal flows, and transaction state management

Technologies: *Next.js, Supabase, Paystack API, Tailwind CSS, PostgreSQL, Turborepo, Redis*

Dailies – Social Feed Platform | Social | Live April 2025

- Minimalist social media platform with chronological feeds, daily posting limits, friend connections, and photo sharing
- Grew to 59+ registered users with 100+ posts and 165+ comments through organic growth only, zero paid acquisition
- Implemented real-time features using WebSockets and Prisma ORM for efficient database operations

Technologies: *Next.js, Supabase, Prisma ORM, WebSockets, Tailwind CSS*

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Three.js, Shadcn UI
Backend	Node.js, Express.js, Django, Python, REST API development, WebSockets, NestJS
Databases	PostgreSQL, Supabase, MongoDB, Firebase Firestore, Prisma ORM, Redis (Upstash), Neon DB
Cloud & DevOps	AWS S3, AWS EC2, Vercel, Git, GitHub, Docker, Turborepo, k6
Payments & AI	Paystack, Stripe, OpenAI API, Gemini AI, Tesseract.js, Mapbox, OAuth, Firebase Auth
Testing	Jest, Mocha, Playwright, Lighthouse, Web Vitals, Performance Optimisation
Mobile	React Native, Expo (prebuild), Kotlin, Cross-platform Development

KEY ACHIEVEMENTS

- NGN 300,000+ in real transaction volume processed across Chowvest payment flows
- 99% AI extraction confidence achieved on DocuLens via cross-validated OCR + Gemini Vision pipeline
- Cross-platform monorepo architecture delivering shared AI logic across web and iOS simultaneously
- 59+ organic users and 165+ comments on Dailies with zero paid acquisition
- 40% reduction in data retrieval latency via REST API optimisation at Starboard AI
- 25% page load time improvement across multiple production applications
- 95+ Lighthouse scores across all performance metrics on HatsOffwears
- 8+ production applications shipped across fintech, social, e-commerce, AI, and data engineering domains

CERTIFICATIONS & TRAINING

ALX Foundations – Pro Frontend Development | 2025 | 100+ hours advanced full-stack training

INTERESTS

Open-source contribution • UI/UX design • Web performance optimisation • AI and ML integration • Financial technology
